Kabul, Afghanistan

PROFESSIONAL PROFILE

Senior Network Engineer and **University Lecturer** with over **6** years of progressive experience in **Network Administration, IT support, IT Assistant, IT Officer** infrastructure management, and academic instruction. Skilled in designing, implementing, and maintaining secure, scalable, and high-performance network systems. Strong expertise in routing, switching, troubleshooting, and ensuring network availability, reliability, and security. Experienced in managing enterprise IT environments across service providers, research institutions, and higher education sectors. Proven ability to resolve complex technical issues and deliver effective networking and IT solutions in critical environments. Committed to continuous professional development and integrating industry expertise into academic teaching and innovation.

TECHNICAL SKILLS

- Active Directory
- IP Telephony & VoIP
- SLA Management
- Windows & Linux
- Backup Recovery
- Hardware & Software Troubleshooting
- IT Automation & Scripting
- Software & Hardware Installation
- IT Documentation & Reporting
- CCTV & Biometric System
- Virtualization
- Endpoint Security
- Storage Management
- IT Assets Management
- AI- Power Troubleshooting
- Microsoft 365
- Starlink Installation
- System Upgrade
- Network Configuration
- Firewall & Router
- Static Route
- RIP
- OSPF
- EIGRP
- BGP
- Enhanced Switch Technology
- Layer 3 Technical Support

EDUCATION

- **Bachelor Degree in Information Technology (IT) JAHAN UNIVERSITY 2019 – 2022**
- **Associate's Degree in Engineering TTTA 2016 – 2017**
- **Diploma In English Language Kabul Center Institute (KCI) 20/11/2022**

PROJECTS

- **Master Plan, Enterprise Security Plan Network Design, Implementation, and Deployment for MOD**

Developed and implemented a comprehensive enterprise network and security plan to support secure, reliable, and scalable organizational infrastructure.

- **Network Scalability issues in IoT Deployments (Research Project) at Jahan University**

Conducted research on network scalability challenges in IoT deployments and explored effective solutions for managing the growing number of connected devices.

- **Enterprise Network Design, Implementation, and Deployment for TTRA Organization**

Designed, implemented, and deployed a scalable and reliable enterprise network infrastructure to support the organization's operational requirements.

- **CCTV Surveillance System Design and Deployment for TTRA Organization**

Designed and deployed a comprehensive CCTV surveillance system to enhance organizational security, monitoring, and operational safety.

PROFESSIONAL EXPERIENCE

Feb 2026 – Present | University Lecturer | Jahan university | Kabul, Afghanistan (Part Time)

- Deliver lectures and practical training in CCNA, CCNP, Networking, Network Security and Cybersecurity.
- Prepare course materials, and support students in developing technical and professional skills.

August 2026 – Present | Network Security Engineer | MOD | Kabul, Afghanistan

- Design, implement, and maintain secure and reliable enterprise network infrastructure.
- Monitor network performance and security, identify vulnerabilities, and respond to security incidents.
- Configure and manage network security solutions, including firewalls, access controls, and security policies.
- Conduct network security assessments and implement to strengthen the organization's overall cybersecurity posture.

August 2025 – July 2026 | Senior Network Engineer | MOD| Kabul, Afghanistan

- Designed, implemented, and maintained enterprise network infrastructure to ensure reliable and efficient connectivity.
- Configured and managed routers, switches, firewalls, and other network devices.
- Monitored network performance and troubleshot complex connectivity and infrastructure issues.
- Implemented VLANs, routing, switching, and network segmentation to improve security and performance.
- Managed and maintained wired and wireless network infrastructure across the organization.
- Designed and implemented network security policies and access control solutions.' Conducted regular network assessments and implemented improvements for scalability, reliability, and security.
- Provided technical leadership, documentation, and support for network operations and infrastructure projects.

April 2022 – June 2025 | Network Admin | Technical and Technology Research Administration (TTRA)

➤ Key Responsibilities & Achievements:

- Designed, implemented, and managed LAN/WAN network infrastructure, including routers, switches, firewalls, VPNs, and wireless networks.
- Configured and supported network devices from Cisco Systems, MikroTik, TP-Link, Linksys, Starlink and D-Link.
- Designed scalable network architecture based on Cisco hierarchical design models and implemented network optimization solutions.
- Configured secure site-to-site VPN connections and managed firewall security using Cisco ASA and next-generation firewall solutions.
- Implemented and troubleshot routing protocols including OSPF, EIGRP, BGP, and other Layer 2/Layer 3 technologies.
- Deployed and managed IP telephony solutions, including Cisco IP phones and voice network services.
- Designed, deployed, and maintained CCTV surveillance systems and related network infrastructure.
- Developed IT operational plans, network documentation, security policies, and standard operating procedures for IT and server room environments.
- Led technical teams during network deployments, infrastructure upgrades, and troubleshooting activities.

Jan 2021 – Feb 2022 | Network Support Engineer | Sky Connect Internet Service Company

➤ Key Responsibilities & Achievements:

- Installed, configured, and troubleshot routers, switches, firewalls, wireless devices, and point-to-point (PtP) links.
- Managed and supported Cisco Systems and MikroTik network devices in ISP environments.
- Configured LAN, VLAN, TCP/IP, NAT, DHCP, DNS, VPN, and firewall policies.
- Monitored network performance, diagnosed connectivity issues, and provided technical support for network services.
