Network Engineer

[LinkedIn Profile](#)

Kabul, Afghanistan

PROFESSIONAL PROFILE

Network Engineer and University Lecturer with over 5 years of progressive experience in network administration, IT support, infrastructure management, and academic instruction. Skilled in designing, implementing, and maintaining secure, scalable, and high-performance network systems. Strong expertise in routing, switching, troubleshooting, and ensuring network availability, reliability, and security. Experienced in managing enterprise IT environments across service providers, research institutions, and higher education sectors. Proven ability to resolve complex technical issues and deliver effective networking and IT solutions in critical environments. Committed to continuous professional development and integrating industry expertise into academic teaching and innovation.

TECHNICAL SKILLS

- Active Directory
- IP Telephony & VoIP
- SLA Management
- Windows & Linux
- Backup Recovery
- Hardware & Software Troubleshooting
- IT Automation & Scripting
- Software & Hardware Installation
- IT Documentation & Reporting
- CCTV & Biometric System
- Virtualization
- Endpoint Security
- Storage Management
- IT Assets Management
- AI- Power Troubleshooting
- Microsoft 365
- Starlink Installation
- System Upgrade
- Network Configuration
- Firewall & Router
- Static Route
- RIP
- OSPF
- EIGRP
- BGP
- Enhanced Switch Technology
- Layer 3 Technical Support

EDUCATION

- **Bachelor Degree In Information Technology (IT)** JAHAN UNIVERSITY 2019 – 2022
- **Associate's Degree in Engineering** TTTA 2016 – 2017
- **Diploma In English Language** Kabul Center Institute (KCI) 20/11/2022

PROJECTS

- **Network Scalability issues in IoT Deployments (Research Project) at Jahan University**
 - Conducted in-depth research on network scalability challenges associated with large-scale Internet of Things (IoT) deployments.
 - Analyzed key issues including network congestion, device management, addressing limitations, interoperability, and security concerns.
- **Enterprise Network Design, Implementation, and Deployment for TTRA Organization**
 - Designed, implemented, and deployed an enterprise network infrastructure supporting over 300 users across multiple departments.
 - Planned and configured network architecture utilizing fiber optic backbone links and Ethernet connectivity to ensure high availability and reliable communication.
 - Installed, configured, and managed Starlink Internet, ASA 5545 NEX Firewall, 2 Cisco routers include Voice Router 22 3850, 3650, 3750 network switches, 30 wireless access points, and 50 Cisco IP phones 7821, 7841 within the enterprise environment.
 - Implemented IP addressing schemes, VLAN segmentation, routing RIP, OSPF, EIGRP, switching, and network security best practices to optimize performance and scalability.
 - Conducted network testing, troubleshooting, and performance optimization to ensure stable and efficient operations.
- **CCTV Surveillance System Design and Deployment for TTRA Organization**
 - Designed and deployed a large-scale IP-based CCTV surveillance system consisting of 100 network cameras across multiple organizational locations, including biometric system.
 - Configured and integrated surveillance infrastructure with 5 monitoring/control rooms to provide centralized security monitoring and incident management.
 - Installed and configured network connectivity, recording systems, and monitoring platforms to ensure continuous surveillance coverage.

PROFESSIONAL EXPERIENCE

Feb 2026 – Present | University Lecturer | Jahan university | Kabul, Afghanistan (Part Time)

- Taught Network Routing & Switching, Network Security and Cisco Systems CCNA courses.
- Delivered theoretical and practical lab training on routing, switching, TCP/IP, subnetting, VLANs, and
- Prepared course materials, conducted assessments, and evaluated student performance.
- Guided students in hands-on networking labs and technical projects.

April 2022 – June 2025 | Network Engineer | Technical and Technology Research Administration (TTRA)

➤ Key Responsibilities & Achievements:

- Designed, implemented, and managed LAN/WAN network infrastructure, including routers, switches, firewalls, VPNs, and wireless networks.
- Configured and supported network devices from Cisco Systems, MikroTik, TP-Link, Linksys, Starlink and D-Link.
- Designed scalable network architecture based on Cisco hierarchical design models and implemented network optimization solutions.
- Configured secure site-to-site VPN connections and managed firewall security using Cisco ASA and next-generation firewall solutions.
- Implemented and troubleshooted routing protocols including OSPF, EIGRP, BGP, and other Layer 2/Layer 3 technologies.
- Deployed and managed IP telephony solutions, including Cisco IP phones and voice network services.
- Designed, deployed, and maintained CCTV surveillance systems and related network infrastructure.
- Developed IT operational plans, network documentation, security policies, and standard operating procedures for IT and server room environments.
- Led technical teams during network deployments, infrastructure upgrades, and troubleshooting activities.

Jan 2021 – Feb 2022 | Network Support Engineer | Sky Connect Internet Service Company

➤ Key Responsibilities & Achievements:

- Installed, configured, and troubleshooted routers, switches, firewalls, wireless devices, and point-to-point (PtP) links.
- Managed and supported Cisco Systems and MikroTik network devices in ISP environments.
- Configured LAN, VLAN, TCP/IP, NAT, DHCP, DNS, VPN, and firewall policies.
- Monitored network performance, diagnosed connectivity issues, and provided technical support for network services.

LANGUAGE

- Pashto
- Dari
- English
- Arabic Basic

CERTIFICATES

CCNA	CCNP Fundamentals	IT for Business Success
English for IT 1	English for IT 2	Introduction to Cyber Security
Network Workshop	TEFL 1 TEFL 2 SLT	Introduction to Cryptography & Network
